

INTRODUCTION HE KUPU WHAKATAKI

At Safari Hotels, we act as kaitiaki and pursue a sustainable procurement policy which will stimulate the market regarding a more innovative and sustainable approach to procurement. We do this by choosing consciously for every purchase we make, by examining the entire product life cycle from start to finish and by examining the possibility of fair-trade, certified organic and/or local products.

When the choices involve purchasing products, we take the impact on the environment and humanity into account. Subsequently, we observe every product and service individually, thus establishing our choice of supplier based on what is best for our surroundings and the environment.

PUTTING IT INTO PRACTICE TE WHAKATINANA I NGĀ AKORANGA

- Selecting environmentally friendly and socially responsible products
- Reducing the use of environmentally harmful substances such as in :
 - Environmentally friendly paints with Ecolabel, Environment label, NF environment or natural paints
 - Soap in the refillable soap dispensers (public toilets and guest rooms)
 - Limitation by means of packaging; minimising mono packages and single use plastics
 - If not possible concerning hygiene, recyclable packaging
 - Give preference to local suppliers, vendors who deliver durable goods or suppliers with whom a sustainability declaration is signed . Determine a fixed delivery day, order as much as possible from 1 supplier.
 - Sustainable building materials to be used during construction and / or renovation
- Ensure less harmful production by purchasing more environmentally friendly paper with an eco-label , such as the European Ecolabel , Nordic Swan or Blaue Engel , FSC or PEFC, provided that they are ECF / TCF certified.
- Minimising waste by separating waste fractions (paper, cardboard, glass , KGA , cartridges and toners)
- Purchasing carbon neutral products
- Implement energy saving measures by buying energy efficient lighting such as LED lights (unlike halogen and incandescent) . Energy-efficient equipment will also be purchased with an A-label.
- When purchasing new equipment we give preference to energy-efficient and water-saving equipment.
- When speaking of less environmentally harmful products or socially responsible products , products are defined with recognised certification
